

SUBTERRAIN PRO SERIES

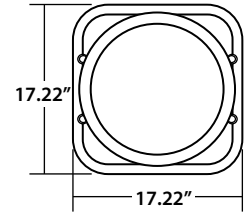

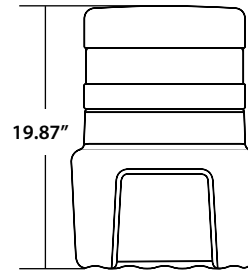

TruAudio's upgraded SubTerrain™ Pro Series outdoor subwoofer features a 40% smaller footprint for easier ground installation, along with convenient built-in handles for effortless placement. Its sealed enclosure design eliminates the risk of water intrusion, while the woofer is strategically positioned at the top of the chamber to allow for easy servicing—no need to dig up the entire unit. Integrated anchor points help prevent the subwoofer from shifting or rising in high-moisture environments. With enhanced output performance, the SubTerrain Pro Series delivers deep, powerful bass that will impress your outdoor guests and elevate any landscape audio system.

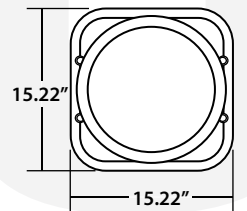

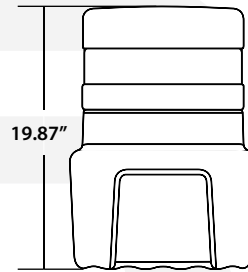

ST-12PRO
